SUPPLEMENTAL DETAILED ACTION

- This action is responsive to the following communication: PPH request filed on 9/13/07, wherein PPH has been granted on 10/17/07.
- IDS filed on 7/15/07 has been considered and herein attached (PTO 1449) with Office Action.

Allowable Subject Matter

- Claims 1-24 are allowable over prior arts.
- The following is an examiner's statement of reasons for allowance: The cited prior arts (US 5,134,495 to Frazier et al; US 5,109,283 Carley as provided by IDS) teach an apparatus converting resolution, but the prior arts fail to teach and/or suggest "a processing unit for determining the position of a target pixel in the first image data in accordance with the ratio of the second resolution M to the first resolution N, and generating and outputting a plurality of pixel values based on values of pixels in an area defined by the target pixel; a selection signal generating unit for generating a selection signal in accordance with a value based on the target pixel and the attribute signal representing the attribute of the target pixel and in combinations of other features" as cited in independent claims 1, 10, 12, and 21. The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in claims 1, 10, 12, and 21.
